

Strasbourg.

SXB1

The first urban center in France classified as a World Heritage Site by UNESCO in 1988, Strasbourg is a prosperous city in eastern France. Much more than the capital of the Grand Est region, it is a center where the dynamism of trade mixes with booming technological development. With a robust economy and a growing interest in technology and innovation, Strasbourg attracts businesses and entrepreneurs. It lies at the crossroads of northern and southern Europe, and transport infrastructure fuels its economy: Strasbourg boasts eight airports accessible in less than 2 hours, a European rail hub, a river port, high-speed internet connections, and an economic basin that can reach up to 35 million people. nLighten's presence in Strasbourg offers exceptional data center services to meet the demands of businesses, thus strengthening the city's position as a telecommunications and technology center.

nLighten Strasbourg.

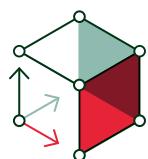

Rue Jean-Dominique Cassini
67400 Illkirch-Graffenstaden

Location specifics.

The data center is conveniently located in the south of Strasbourg, close to the A35 motorway and just 15 minutes from Strasbourg Airport. The data center has an area of 600 m², 1,200 kW of power, an office area and ample parking space.

Like the other nLighten facilities, the Strasbourg location enables our customers to benefit from a well-connected, high-availability data center and capable of housing high-density cabinets. The data center comes with a wide range of on-site services and an established ecosystem of partners, all there to optimally support our customers' IT environment.

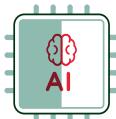

Highlights.

600 m²
of edge data center space

1,200 kW
site capacity (end-state)

High Density
(AI ready): 15 kW to
150+ kW

Edge data center Strasbourg Features.

DATA CENTER

Location	Conveniently located for easy access by road and public transport	✓
Design	Tier III design target	✓
Connectivity	Carrier-neutral data center with diverse fibre entry points and meet-me areas for rapid activation	✓
Cooling	Cooling and humidity design complying with ASHRAE A1 allowable category	✓
Compliance	We adhere to industry-leading standards, comply with applicable regulations, and continuously enhance our infrastructure and security posture. Explore our certifications	✓

POWER

Redundant power with independent A and B feeds to each cabinet	✓
Site capacity (end-state)	1,200 kW
Design Power Usage Effectiveness (PUE)	1.29
Standard Power Density (air cooling): 2-7 kW, up to 15 kW per cabinet	Yes
High-density (AI-ready): 15 kW to 150+ kW	On request

SUSTAINABILITY

Heat recovery; residual redirected to local heating networks	Feasibility study
100% carbon free energy backed by Guarantees of Origin	Yes
Power Purchase Agreement (PPA)s	Yes
Integrated Carbon-Free Energy (ICFEn) score calculated	Yes

SECURITY

Dual factor access control (pin/biometrics)	✓
CCTV – Full coverage, storage in compliance with local laws	✓
Fire suppression in the data hall	✓

SUPPORT

24/7 service desk and 24/7 access to NOC services	✓
On-site services	✓
